PROFESSIONAL SUMMARY

Management Information Systems student with internship experience in Software Development, ERP Systems, Quality Assurance, Cloud Computing, and Digital Transformation projects. Skilled in Java, Spring Boot, .NET Core, Python, SQL, REST APIs, AWS, Azure, Selenium, and Agile methodologies. Demonstrated ability to contribute to enterprise-scale software solutions, ERP implementations, API development, software testing, and cloud-based systems. Seeking opportunities in Software Engineering, Business Technology Consulting, ERP Consulting, Digital Transformation, Technology Risk, and Cloud Engineering.

CORE COMPETENCIES

Software Development | Object-Oriented Programming (OOP) | Java | Spring Boot | .NET Core | C# | Microservices Architecture | RESTful API Design & Development | ERP Systems (SAP/Oracle Concepts) | Enterprise Application Development | Business Analysis | Requirements Gathering & Documentation | Digital Transformation | IT Consulting | System Integration | API Integration | QA & Software Testing | Test Automation | Selenium WebDriver | Postman | API Testing | Unit Testing | Integration Testing | SQL | Database Design & Optimization | Relational Database Management Systems (RDBMS) | MySQL | PostgreSQL | Microsoft SQL Server | Cloud Computing | AWS (EC2, S3, RDS basics) | Microsoft Azure (App Services, Azure DevOps basics) | DevOps Practices | CI/CD Pipelines | Docker (containerization basics) | Agile Methodologies (Scrum, Kanban) | SDLC (Software Development Life Cycle) | Version Control (Git, GitHub, GitLab) | Performance Optimization | Debugging & Troubleshooting | Process Analysis & Modeling | UML (Use Case, Class Diagrams) | Technical Documentation | Enterprise Architecture Awareness | Cybersecurity Awareness (OWASP basics)

TECHNICAL SKILLS

Programming Languages: Java, Python, C#, JavaScript, TypeScript, SQL, C++, C, Go (basics), HTML5, CSS3, Bash/Shell Scripting

Backend Development: Spring Boot, Spring MVC, Spring Security, Hibernate, .NET Core, ASP.NET Core, Entity Framework, Node.js, Express.js, RESTful APIs,

Microservices Architecture, API Design & Integration, SOAP APIs (basic), GraphQL (basic)

Frontend Development: HTML5, CSS3, JavaScript, TypeScript, React.js (basic/intermediate), Angular (basic), Responsive Web Design

Databases: MySQL, PostgreSQL, Microsoft SQL Server, Oracle SQL (basics), Database Design, Query Optimization, Indexing, Stored Procedures, RDBMS Concepts

Software Testing & QA: Selenium WebDriver, JUnit, NUnit, TestNG, Postman, API Testing, Manual Testing, Regression Testing, Integration Testing, System Testing, Test Case Design, Bug Tracking (Jira)

Cloud & DevOps: Amazon Web Services (AWS – EC2, S3, RDS basics), Microsoft Azure (App Services, DevOps basics), Google Cloud Platform (GCP basics), Docker, Kubernetes (basics), CI/CD Pipelines, GitHub Actions, Jenkins (basic), Infrastructure as Code (basic understanding)

Version Control & Tools: Git, GitHub, GitLab, Bitbucket, Visual Studio Code, Visual Studio, IntelliJ IDEA, Eclipse, PyCharm, Linux (Ubuntu), Windows, Agile Tools (Jira, Trello)

Software Engineering Practices: Object-Oriented Programming (OOP), Design Patterns (basic understanding), SOLID Principles, SDLC, Agile / Scrum / Kanban Methodologies, Clean Code Principles, Debugging & Troubleshooting, Performance Optimization

EDUCATION

Yeditepe University – B.Sc. Management Information Systems (100% English)
Istanbul, Türkiye | GPA: 2.50/4.00

Anadolu University – International Relations
Eskişehir, Türkiye

PROFESSIONAL EXPERIENCE

Software Development Intern | EduBridge Base | Jan 2025 – Dec 2025
• Contributed to development of an AI-powered educational platform.
• Assisted backend API development using Java and Spring Boot.
• Optimized SQL queries and database structures.
• Conducted API testing with Postman and supported debugging activities.
• Participated in Agile sprint planning and software delivery processes.

ERP Intern | Kaytazdere Municipality | May 2025 – Sep 2025
• Supported ERP implementation across Finance, HR, and Public Works departments.
• Performed business process analysis and workflow documentation.
• Conducted user acceptance and system testing activities.
• Assisted analytical reporting and digital transformation initiatives.

QA & Software Testing Intern | University Technology Lab | Jul 2025 – Oct 2025
• Designed and executed manual and automated test scenarios.
• Developed Selenium-based automation scripts.
• Performed API testing using Postman.
• Reported software defects and participated in regression testing.

SELECTED PROJECTS

Microservices ERP Architecture Transformation (Graduation Project)

• Designed a scalable, cloud-ready ERP modernization architecture using microservices and distributed system principles.
• Performed detailed **monolithic-to-microservices decomposition analysis** based on business capabilities and Domain-Driven Design (DDD).
• Defined bounded contexts and inter-service communication patterns using RESTful APIs and asynchronous messaging concepts.
• Designed an **event-driven architecture model** to improve system responsiveness and fault tolerance.
• Developed high-level architecture diagrams covering service layers, API Gateway, service registry, and configuration management.
• Evaluated migration strategies from legacy ERP systems to cloud-native microservices architecture.
• Analyzed performance, scalability, and maintainability improvements compared to monolithic ERP structures.
• Produced full technical documentation including system design, architecture rationale, and deployment strategy.

Serverless Event Booking System

• Architected a fully serverless backend using **AWS Lambda, API Gateway, and DynamoDB** to enable scalable event management.
• Designed and implemented RESTful APIs supporting event creation, booking, cancellation, and user management workflows.

• Applied event-driven design principles to ensure asynchronous processing and system decoupling.
• Integrated authentication and authorization mechanisms for secure API access.
• Implemented Azure Functions for multi-cloud notification processing (email and push notifications).
• Optimized system for **high availability, auto-scaling, and cost efficiency (pay-per-use cloud model)**.
• Designed database structure using NoSQL principles for high-performance data access patterns.
• Performed API testing and validation using Postman collections and test scenarios.

Mobile Expense Tracker Application

• Developed a production-style Android application using **Kotlin and MVVM architecture pattern**.
• Implemented local persistence layer using Room Database (SQLite abstraction).
• Designed modular architecture separating UI, business logic, and data layers.
• Built interactive dashboards for expense tracking, category-based analytics, and financial insights.
• Integrated notification system for budget reminders and spending alerts.
• Implemented data validation and error handling mechanisms for reliable user experience.
• Optimized application performance for low memory usage and smooth UI transitions.
• Focused on clean architecture principles and maintainable code structure.

Cloud-Connected Weather Application

• Built Android application consuming external **RESTful weather APIs** for real-time meteorological data.
• Integrated Firebase backend services for cloud data synchronization and lightweight storage.
• Designed location-based weather detection using device GPS services.
• Implemented dynamic UI rendering based on weather conditions (temperature, humidity, forecast).
• Optimized API request handling with caching strategies to reduce redundant network calls.
• Improved user experience through responsive design and adaptive layouts.
• Handled network failures and offline scenarios with fallback mechanisms.

Grocery Store Management System

• Developed a desktop-based inventory and sales management system using **Python and MySQL**.
• Designed normalized relational database schema for products, inventory, suppliers, and sales transactions.
• Implemented full CRUD functionality for product lifecycle management.
• Built reporting module for stock tracking, low inventory alerts, and basic sales analysis.
• Applied SQL optimization techniques for efficient query performance.

.

LEADERSHIP & EXTRACURRICULAR ACTIVITIES

Huawei Student Developers – Content Team Lead
• Led content strategy, team coordination, and digital engagement initiatives.

Patika Perspective – Organization Team Member
• Supported planning and execution of technology-focused events and workshops.

CERTIFICATIONS

• Cisco Networking Academy – Introduction to Cybersecurity (2026)
• BTK Akademi – Mobile Security and Penetration Testing (2026)
• BTK Akademi – Introduction to Software Testing (2026)
• Huawei Cloud DevOps Bootcamp (2025)
• Huawei Cloud Acceleration Program (2024)
• Patika.dev – Java Backend Development Pathway (2024)
• Patika.dev – .NET Core Development Pathway (2024)
• Patika.dev – Kotlin Mobile Application Development Pathway (2025)
• Patika.dev – Test Automation Pathway (2025)
• Patika.dev – Frontend Web Development Pathway (2025)
• Turkcell Geleceği Yazanlar – Basic Linux (2025)
• Vodafone – One Day at Vodafone: Network & Cloud Systems (2026)
• TÜREB – Entrepreneurship and Business Idea Development (2025)
• Etkin Kampüs – Canva for Digital Content Creation (2026)

• AWS Certified Cloud Practitioner *(recommended)*
• Microsoft Azure Fundamentals (AZ-900) *(recommended)*
• Google Cloud Digital Leader *(recommended)*
• ISTQB Certified Tester – Foundation Level *(recommended for QA track)*
• Oracle Certified Associate – Java SE *(recommended for backend track)*

VOLUNTEER EXPERIENCE

• Actively participated in humanitarian aid campaigns supporting disaster relief operations, emergency response activities, and community assistance programs.
• Contributed to environmental sustainability initiatives focused on reforestation, biodiversity protection, and ecological awareness campaigns.
• Supported public awareness activities related to health, social responsibility, and environmental protection.
• Assisted in the organization and execution of field activities, donation drives, and volunteer coordination efforts.
• Engaged in teamwork-based operations, improving coordination, communication, and organizational skills in real-world environments.
• Participated in community outreach programs aimed at increasing social responsibility and civic engagement.
• Gained experience in working within structured non-governmental organization (NGO) environments with mission-driven objectives.
• Developed strong soft skills including empathy, teamwork, leadership support, and adaptability in dynamic field conditions.

LANGUAGES

Turkish (Native)
English (C1)
German (Basic)

ADDITIONAL INFORMATION

Areas of Professional Interest

Software Engineering & Enterprise Application Development
Interest in designing and developing scalable enterprise applications using modern software engineering principles. Focused on backend development, object-oriented programming (OOP), microservices architecture, RESTful API development, system design, and software development lifecycle (SDLC).

Enterprise Resource Planning (ERP) & Business Process Management
Interest in ERP systems, enterprise application integration, and business process optimization. Focused on workflow analysis, process automation, system integration, and supporting digital transformation initiatives within organizations.

Technology Consulting & Digital Transformation
Aspiring to work in technology consulting and digital transformation projects. Focused on IT modernization, enterprise system transformation, solution design, change management, and aligning technology with business objectives.

Business Analysis & IT Project Management
Interest in requirements gathering, stakeholder communication, process modeling, and solution design. Focused on translating business needs into technical requirements and supporting end-to-end project delivery.

Cloud Computing & Modern Infrastructure
Interest in cloud-native architectures, distributed systems, and scalable infrastructure. Familiar with AWS, Microsoft Azure, and Google Cloud Platform concepts including compute, storage, and cloud services fundamentals.

DevOps & Continuous Delivery
Interest in CI/CD pipelines, containerization, infrastructure automation, and DevOps practices. Focused on improving software delivery efficiency, reliability, and deployment automation.

Cybersecurity & Technology Risk
Interest in application security, vulnerability assessment, risk management, and secure software development practices. Awareness of cybersecurity frameworks and secure coding principles.

Software Quality Assurance & Test Automation
Strong interest in software testing, test automation, API testing, regression testing, and quality assurance processes. Focused on improving software reliability and defect prevention.

Data Analytics & Business Intelligence
Interest in data-driven decision making, reporting, dashboards, and business intelligence solutions to support operational and strategic insights.

Artificial Intelligence & Emerging Technologies
Interest in AI, machine learning, generative AI, and intelligent automation technologies in enterprise environments. Focused on how emerging technologies create business value.

Professional Strengths

• Analytical Thinking and Problem Solving
• Strong Adaptability and Continuous Learning
• Team Collaboration and Cross-Functional Communication
• Business–Technology Alignment Perspective
• Process Improvement and Operational Efficiency Focus
• Project Coordination and Task Management Skills
• Technical Documentation and Reporting
• Attention to Detail and Quality-Oriented Mindset
• Initiative in Academic and Project-Based Work

Career Objective

To build a career in Software Engineering, Technology Consulting, ERP Consulting, Business Analysis, Cloud Technologies, and Digital Transformation by contributing to enterprise-level projects, developing scalable software solutions, and continuously improving technical expertise to deliver business value through technology.
